Intr & Safety

Getting You Home Safely
It's everyone's right to know that they will be returned home safely to the most important people in their life. Partner with Health & Safety Ontario to bring this vision to your workforce.

HOME > IHSA

Welcome
The Infrastructure Health & Safety Association (IHSA) works with employers and workers in Ontario to eliminate occupational injury and illness. It serves the aggregates, construction, electrical, ready-mix concrete, transportation, and utilities industry. IHSA was created in May 2010 by amalgamating the Ontario, the Electrical & the Transportation Services, and health and safety.

OUR LOCATIONS

Summary of strategic assessment

Strengths

- Strong industry knowledge and relationships
- Effective health and safety system partnerships
- Well developed relationships with influencing stakeholders
- Unique expertise and capability in managing the hazards of high-risk activities
- Unique training and program development capabilities
- 22 pre-paid training programs

Challenges

- Access to remote communities
- Culturally specific programming
- Various differences between Federal and Provincial Health and Safety legislation
- Acceptance by members of band for outside organization providing services
 - Where do we start?
 - What does safety mean to those that are closest to you?

Opportunities

- Established an expanded role in training for the upcoming Ring of Fire
- Developing a system-wide role in product development and delivery for high-risk activities
- Building new and enhanced relationships with First Nation communities
- Rationalizing product and services

Threats

- Outside development creating unsafe atmosphere's
- Employment turnover and training gaps
- Inadequate sector training providers
- The belief that it "Won't Happen to Me!"
